

Rogaining Qld SEQ Rogainer of the Year Series Points System

Preamble

As a way of adding interest and spice to Rogaining Queensland's SEQ events programme we introduced the SEQ Rogainer of the Year series in 2017.

System

The events to be included in the series are shown on the SEQ event calendar:

<https://qldrogaine.asn.au/event-calendar/>

1. These events form the Rogaining Queensland SEQ Rogainer of the Year series and competitors in all these events will receive points based on their placing in the event.
2. Points are awarded to individuals not teams. Every member of a team in a particular event receives the same number of points.
3. A competitor's points from their best 50 hours shall be their final points score for the year
4. Competitors shall receive ROTY points based on their percentage of the winning team score in the event, multiplied by the nominal duration of the event, multiplied by 100. The formula is:
$$\text{ROTY points} = (\text{team score}) / (\text{score of winning team}) * (\text{event duration}) * 100$$

For example, if a team in 24hr event gets exactly 50% of the winning team's event score they will receive $0.5 \times 24 \times 100 = 1,200$ ROTY points for that event.
5. If a short course is offered in conjunction with a longer course, ROTY points in the shorter course will be allocated as if they had earned the same score in the longer course.

For example, if a team entered in a 6hr course had an event score of 500 when the winner of the 12hr course had an event score of 1000, they would receive $500 / 1000 \times 12 \times 100 = 600$ ROTY points for that event.
6. If more than one team clears a course (collects all CPs), they will be allocated a bonus score of 1 point per minute for every minute they finished early, prior to calculation of ROTY points. For example, if the winning team earned an event score of 2500 and finished 25 minutes early, their event score would be adjusted to 2525 points before calculation of ROTY points is undertaken.
7. For each event a record will be kept of the following for each competitor:
 - a. Course duration
 - b. Event score
 - c. ROTY Points per hour
8. As it is unlikely that most competitors will have their best 50 hours in events that exactly total 50 hours the points for one event will be prorated as necessary to get the required best 50 hours score.
9. Any QRA member who is prevented from competing in an event because of volunteer tasks they undertook for that event will be eligible for ROTY points with a score of the maximum duration course in the event they volunteered for times the ROTY points per hour for their best competition event during the series. The maximum number of scoring volunteer hours shall not exceed 24 in the series.
